Fritter Batter

Thin -

1 cup flour
1 tsp. baking powder
½ tsp. salt

1 egg
1 cup milk
¼ cup vegetable oil

Measure flour by dip-level-pour method or by sifting. Blend dry ingredients in bowl. Mix egg, milk + oil. Add to dry ingredients.

Beat with rotary beater until smooth. Prepare food to be fried. Thaw frozen foods completely before frying. Parboil foods where indicated. Heat fat or vegetable oil to 375°, using either a frying kettle or skillet. Kettle should not be more than 1/3 full of oil or fat; oil in skillet should be 1" deep - just deep enough to float food. Fry food thoroughly.

Coat with flour. Using tongs or fork, dip food into batter, letting excess drop off. Either Thick or Thin Fritter Batter will work well for most foods. Use Thin Batter when you want to retain shape of food, such as shrimp, fruit slices or onion rings. Fold chopped or grated foods into Thick Batter. Fry until golden. Frying time

depends on food. Foods dipped in Thick Batter will take about 1 min. longer. Drain on absorbent paper. Serve meat + sea food fritters as appetizer or main dish; fruit + vegetable fritters as meat accompaniment; fruit fritters as dessert with confectioners' sugar or a sauce
