

Dearest (name)

This stinking stuff is cheese - you can wear a mask if necessary, but I know you have been waiting for it and in spite of the terrible odor it will taste good.

Take each, wash all the mold off - then roll each one in oil, then in the salt and water well coated then pack in a container with a lid on it and keep in a cool place or in the bottom of your refrigerator, it is so good on fried eggs and Syrian bread. That's the story of our life the Syrian goodies are good and one gets too much and gets too fat but not you thank goodness.

Hilda tells me you were sick and Billy to, I am so happy you are well, I wish we were all close together so when some one gets sick we are there to help, take care of yourselves please, you mean so very much to me - that is - all of you.

Now about kibbel, it
is very simple to make. The
secret is two thirds of the kibbel
should be pure meat sofat
ground very fine - then take
say the other third should be
about 2 cups of fine wheat
mashed and add salt, pepper, allspice and
cinnamon to taste, mix well
with the wheat then add
meat and mix very well
and a small onion chopped
fine and a cup ground in meat
grinder. Then you mix all
ingredients use ice water to soften
the texture - taste to see if seasoning
is right - the filling to make with
laminar beef ground coarse, brown
in butter, onion and onion salt & pepper
to taste ~~of~~ portion some pine nuts
in butter, and add to meat & onion.
You can make it in pan or
individual if you can still
remember. Bake in greased pan
about 325-350. I hope I you
show you previously some time
soon - Give John and Mary for
me - I love you all
Best
