

Coffee Liqueur

6 cups sugar

3 quarts water

$\frac{3}{4}$ cup instant coffee

3 tablespoons pure vanilla extract or 3
vanilla beans

6 cups vodka

Combine the sugar, water, instant coffee
and vanilla beans, if using. Bring to boil.
Watch carefully to prevent mixture from
boiling over. Reduce heat to a simmer & cook

for 1 1/2 hours. Cool completely. Add vanilla and vodka. Pour into bottles and drop a coffee bean into the bottom of each. Allow to age in a cool dark place for about 4 weeks. Recipe can be doubled.

Makes about 9 1-pint bottles.
