

"Aunt Belle's Brown Candy"

- 3 pints "sugar
- 1 pint milk or thin cream
- $\frac{1}{4}$ lb. butter
- $\frac{1}{4}$ t. soda
- 1 tsp. vanilla
- 1 pound (coffee can full) broken pecan nuts.

Put 1 pint sugar in a heavy iron skillet, place over low flame and stir with wooden spoon until the sugar is entirely melted and light brown in color. Keep stirring steadily and take care that the sugar does not get too hot. It will take over one-half hour to melt the sugar properly.

As soon as you have the sugar started, put the other 2 pints of sugar with the milk or cream into a deep heavy kettle, set it over low heat and cook slowly while the sugar is melting in the skillet.

When the (1 pint) sugar is melted, pour it in a thin stream about the size of a

← does not need to be clear, just melted

putting ~~meat~~ into the
boiling milk and sugar
keeping it on low heat stir-
ring constantly. Continue cook-
ing and stirring until the
mixture forms a firm ball
when dropped into cold water.

After this test is made
set the kettle off the heat
and immediately add the
soda, stirring vigorously, as
the mixture foams. As soon
as soda is mixed in, add
bitter, stirring until it melts.

Allow candy to cool ^{10 minutes} ~~15 minutes~~
