red pepper flakes

stirring occasionally until it comes to barely a simmer (there

should be just a hint of movement on the surface of the oil.) Adjust the heat to the lowest possible setting to keep the mixture at a gentle simmer and cook stirring occasionally until the garlic is soft and pale golden - about 30 minutes. →

Add the lime juice and simmer until most of the juice is evaporated, about 5 min. Stir in the chilis - then taste add more salt if you think it needs it. Cool & put in a glass jar
